Amity School district strives to provide each of our students with an education that will allow them to pursue their desired career path following high school. This means that we address all facets of a student's development, providing not only a well-rounded academic experience, but also the opportunity to be involved in many other activities that develop the whole person. We will also continue to provide excellent "customer service" to our parents and the community, making sure they know how much we are committed to our students' success in life.

The Division 22 standards of the state of Oregon are a list of requirements that each school district is required to meet. Each year, as superintendent, I am required to publicly disclose our status as it relates to these standards. Amity School District is in full compliance with these standards.

Respectfully,

Jeff Clark
Amity superintendent
